

Designed for heavy applications and harsh conditions

FPT Industrial offers a series of plug-and-play power solutions that fits a wide range of industrial applications. Because all key after-treatment components are pre-assembled and enclosed in a single package, these smart solutions comply with strict emission regulations and eliminate the need for a dedicated exhaust system. They are also easy to install thanks to rigorous testing. A set of off-the-shelf, pre-validated options provides additional installation flexibility.
